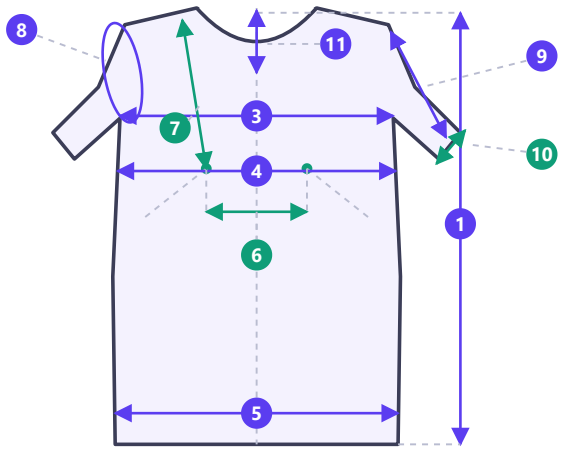
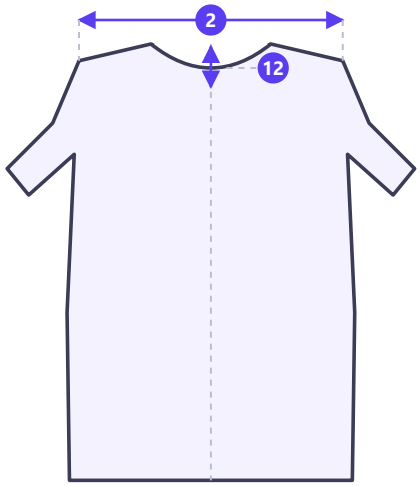
Blouse Measurement Chart

The twelve measurements an Indian blouse needs, and where each one is taken.

FRONT



BACK



Shoulder is taken across the back — the front dips at the neck and reads short.

1. **Blouse Length**
   Shoulder at the neck, straight down the front, to where it ends
2. **Shoulder**
   Across the back, point of one shoulder to the other
3. **Upper Chest**
   Just under the armpits, above the bust
4. **Bust**
   Around the fullest part, tape level at the back too
5. **Waist**
   At the point where the blouse ends
6. **Apex to Apex**
   Between the two bust points — this places the darts
7. **Shoulder to Apex**
   Shoulder at the neck down to the bust point
8. **Armhole Round**
   Around the arm at the shoulder, tape under the armpit
9. **Sleeve Length**
   Shoulder point down the arm, arm relaxed
10. **Sleeve Round**
    Around the arm where the sleeve will end
11. **Front Neck Depth**
    Shoulder line straight down to the neckline
12. **Back Neck Depth**
    The same at the back — always ask separately

Measure over a fitting blouse, keep the tape level and snug, and write each number down as you take it.
